Episcopial Church.
Our dispatches have already amounced the election of three New Blahops of the Methodist Church.
Rev. D. W. Clark is at present the editor of the Lastics' Especiatory, at Cucinnata. He is a netwo of Maine, and has long been one of the most prominent clergy men of his denomination in the West.
Rev. Calvin Kingaley is at present the editor of the Western Christian Advente, at Concurrent II. He is a Pennsylvanian, was for some time at the head of one of the principal Methodist colleges in that State, and has for eight years past acceptably edited the chief organ of his denomination in the West Rev. Dr. Thompson in at present editor of the New York Christian Libraria Journal. He was for many years the President of Delaware College, in Obio, and is, we believe, an Englishman by birth.

Lake Superior territory, proved rich in coal, lead, copper and iron, has been thought to be endowed with more valuable minerals. If little surface gold has been found while prespecting for copper, and diver has been gathered in small quantities herefofers. We now learn that a discovery of gold, which promises more in amount and profit than any of its predecessors, has been made in the Haron mountains. A Mr. Livermore, of Marquette, while exploring and progeting the region, found a vain of gold-bearing rock; a toof thick, and in all respects similar to the best gold-bearing rock in Callfornia. The expectations, based on such superficial examination as has been made, and the accompanying results, are that the region will be productive of gold to a large extent If such is the case, there will be enhanced value given to the tarritory that is now rich. The rock which is otherly found there is marble, granite and sandatone. The whole country is fertile and easy of access.

ribels can repair the damages. Our cavalignees caste hearthy apon the work. They are determined that the rebels lines of communication shall remain broken, and to this end they intend to bend their energies. The rebels lost heavily in the several ogcounters. We could have cantaived large numbers of the every, but this was not deemed advisable, as to have kept them would have related the movements of our troops at a time when it was absolutely necessary to be free from all incumbrances. THE POTOMAC ARMY—THE SITUATION.

There is no material, or at least, perceptible change in the situation of the two armies, except that Gen. Grant is pushing toward Richmond, and Lee is moving his columns and fortifying his position in the direction of his own right, in order to meet our forces in that quarter. On Wedesaday on attack, or rither reconnoissance in force, was made upon the enemy's right and other parts of his lips. In this attack, Corroran's old brigade (Irish) took part. They had just arrived from the East. They suffered severely, but obtained a lodgment within the comy's outer hims. The inner line was, however, found to be so strongly fortified, and also protested by shattle in front, that it was deemed nescessary to withdraw the troops. Yesterday, Early's corps made an attack on Gen. Grant's right, which the rebels hoped to find much weakened by the withdrawal of troops towards our left. After a sharp aght, the enemy were repulsed, although they had for a time obtained possession of some of our Toogs towards our left. After a sharp aght, the enemy were repulsed, although they had for a time obtained possession of some of our Todgments, which have heartedone been garfacoling our fortifications, and Gen. Made was an piezsed with the admirable manner in which they fought, that he is not a colognal material on there is in the nevice. Some of chass are eighten in sundered and two is also and an action. The artillery regiments are as min material on there is in the nevice. Some of chass are eighten hounded with Fed.
